The grand jury, which began a see

The grand jury, which began a session of 17 days March 3, returned 24 indictments against defendants, on gambling charges and sales of liquor wets preferred, were transcribed to the county court. These defendants with the exception of one who has not yet been apprehended, have made hend and been released pending the trials of their cases.

No arraignment of those defendants cited to appear on the other charges before the district court for trial have been made. Judge oven Gwen stated Saturday that since practically all the defendants had made bend, the arraignments would not be held until disposition of matters now before the district court were made.

Heavy Divorce Docket.

An equity docket of more than 406 An equity docket of more than too cases, the major part of which were petitions for disorce, many of which had been in the superior court for a long period, was disposed of by Judge L. J. Martin during the first two weeks of the March term of his

docket of about 200 cases beginning next Tuesday.

Five convictions and more than 25

pleas of guilty were obtained at the special March term of district court, criminal session, Judge Redmond Si Cole presiding. This term was called for the purpose of bringing to trial many defendants held in the county jail in default of bond.

jail in default of bond.

County Attorney Thomas I. Munroe, with his assistants, J. G. Thompson, Elton R. Hunt and A. Nicodemus, by their action in pressing the
prosecution of those cases, secured
convictions in which sentences of
from one to 20 years were recommended by the jury. All trials before the jury resulted in convictions.

Civil suits in the number of 143
were filed in district court during the
month, and \$1 were filed in superior
court. There were 27 criminal cases
taken to the district court for trial,
either as the result of preliminary
hearings before the courts of Justices H. J. Gray, H. C. Maxey and

A Nation of Spitters!

HE DEMONSTRATION to the world of the United States has given in the recent world's war of the resources, strength, virility and stamina of a united people in a worthy couse has been a matter of supreme gratification to every true American. 'The "Go-to-Hell" Whittlesey spirit in the Argonne forest and the "We never retreat" response to the French at Chateau Thierry astonished the world and characterizes the typical citizen of our great country.

Although we proudly point to our escutcheon on which has never been written the word defeat, the insidious disease tuberculosis is constantly taking its toll of precious lives far in excess of the losses on the bat-

When it is recognized that every man, woman and child becomes infected with tuberculosis at some period of their existence, the necessity for an organized d campaign against its inroads is positively apparent.

The government called only the young men to subdue the Hun, but in this campaign it is absolutely essential that all of us must do our share, for it is only by a combinaiton of effort that successful achievements are attained.

Among the many causes for the spread of tuberculosis is the more or less characteristic habit of the American people that of promiscuous spitting, anywhere and everywhere. The habit has become so unlversal that no attention was paid to it until scientific investigation stepped in an ddemonstrated to us its perniciousness and dangers.

A foreign visitor touring this country some years ago gathered data for a book on America, called us a nation of spitters and became especially condemnatory after someone had accidentally spit in his face while passing along side a street car as the passenger spat out of the window of the car.

The Anti-Spit Campaign of the Tulsa Tuberculosis Association should have the unqualified indorsement and active support of everyone, not only because spitting is a dirty and filthy habit, but because of its being one of the chief means of spreading the tuberculosis germs, called scientifically the tubercle bacilli. It has been demonstrated with the microscope that an amount of sputum designated as a millimeter which is bout one-fourth the size of the head of a pin contain eight hundred million germs, therefore the amount of sputum seen daily on the sidewalks, in the street cars, buildings and other public places in Tulsa is sufficient to contaminate the whole world. The germs are not easily killed, because a culture of the dust after the sputum has dried shows living and active bacteria ..

Health, even life, is endangered on every hand-even more than is popularly believed. It is an individual habit, this spitting habit, to be controlled individually.

DON'T YOU SPIT!

Tuberculosis Association
